

Raywell Contracting

COMPANY SUMMARY

Overview

Raywell Contracting are an earth moving contractor that have been servicing Western Australia with earth moving equipment, operators and civil expertise since 1990. We have an excellent reputation built on service, quality and knowledge and have assisted in many civil projects across state.

Company and People

Raywell Contracting was founded in 1990 with a small fleet of swamp dozers to service a growing demand in the south-west of Western Australia. Our formula for quality service and equipment proved successful which lead to the company expanding in size and diversity.

Now Raywell Contracting employ 20 full time employees and the plant list has grown to over 40 items. We employ 2 full time heavy duty diesel mechanics, 1 apprentice mechanic, 15 machine operators, plus management and administration. Our workshop and offices are located in Pinjarra which is a great location to service areas from Perth to the South West of Western Australia.

The company has grown significantly in almost 25 years of operation however our family values of strong ethics, quality, safety and a commitment to each other are still present in every job we undertake. Senior management are still deeply involved in all aspects of the business and interact regularly with everyone including machine operators to ensure all are working towards the company goal.

Raywell Contracting has 25 years of earth moving experience with a vast amount of knowledge in construction, mining, and civil projects. Raywell Contracting regularly consults to CHC for major tenders and have been instrumental in securing many projects throughout Western Australia.

Projects

Raywell Contracting have provided equipment and knowledge on many projects throughout Western Australia. Below is a summary of our major projects:

Alcoa Residue Disposal Areas

Raywell Contracting currently supply technical information and subcontract for construction and maintenance projects at Alcoa's residue areas in Kwinana, Pinjarra and Wagerup. We carry out works in the following processes:

- Mud dry stacking
- Bay levelling
- Construction of dyke walls from residue mud
- Sand plant management

We have also subcontracted equipment and personnel and have been involved in the following list of Alcoa projects:

- Wagerup RDA's 4, 5, 6, 7, 8 & 9
- Pinjarra Cooling Pond completion
- Pinjarra RDA9 extension
- Pinjarra RDA1 extension

Capabilities and plant list

Our workshop stocks a complete range of spare components for equipment to reduce downtime.

We have qualified team of fitters with many years of experience to diagnose faults accurately and perform quality work in a safe and organised way. Equipment servicing is performed as per the manufacturer's requirements to maintain optimum performance and machine component life.

Forming part of our commitment to quality is continuous improvement through training. We are currently training an apprentice HD Fitter and also engage our employees in external safety courses, permits and mechanical training to ensure they have the skills to perform their tasks safely and effectively.

Our current plant list consists of over 40 items including:

- 17 x LGP dozers in various configurations:
 - 11 x D6
 - 6 x D7
 - Options include:
 - Trimble GPS Grade Control, rippers, plough attachments and V-Pat blade
- 2 x D8T dozers
- 8 x 20 tonne excavators
- 3 x 20 tonne LGP excavators
- 4 x 40 tonne articulated ejector trucks
- 2 x 40 tonne articulated dump trucks
- 3 x 40 tonne articulated water carts
- 1 x 50 tonne rigid water cart
- 2 x tracked loaders with bucket or clearing/carry rake
- Service trucks

To complement our swamp dozers we have engineered a range of swamp (or LGP) excavators to assist in sand pour and general earth works in residue areas. These machines have been widened to accommodate 1500mm track plates to reduce the ground pressure to 2.9PSI, half the ground pressure of a standard 20 tonne excavator.

We also have access to outsource an extensive range of equipment at competitive rates including but not limited to graders, large excavators, scrapers, and loaders.

Raywell Contracting can offer dry hire on short and long term basis, full wet hire with servicing and project supervision.

EHS

Raywell Contracting have an impeccable safety record and are LTI free since 2011. We are dedicated to eliminating all hazards in the workplace and fostering an environment of incident reporting to reduce the chance of personal injury.

We attend and adhere to all Client's safety requirements and actively participate and share ideas in safety meetings to enhance the projects safety culture.

We also follow our own EHS Management Plan that embodies our culture and workplace. This compliments our client's management plan and creates a healthy workplace for our employees, clients and suppliers.

Raywell Contracting employs a system of product recovery in the workshop to reuse, repair or recycle where possible. All machine parts that are faulty are attempted to be repaired before disposal. We recycle the majority of our trash including steel and other metals, paper products and oils to minimise our environmental impact.

More information regarding our safety plan can be found in our EHS Management Plan.

Raywell in the community

Raywell Contracting are a family run company that operate in Pinjarra and are a valuable commodity in the community. We employ throughout the south-west of Western Australia and utilise local suppliers that share our values wherever possible. This has created excellent relationships with many companies that aid in servicing our clients.

We assist with all major fires in the south west region providing machinery and labour. We work with local and state authorities including the Department of Fire and Emergency Services, Department of Parks and Wildlife, along with property owners to help minimise the damage of bushfires.

We also contribute and participate in local charities and events days, including the John Hughes Big Walk, Ride to Conquer Cancer, bushfire appeals and others.
